### Pacific Gas and Electric to Safety Inspect Recent Work Near Public and Private Sewer Lines in Ross Valley

**August 22, 2011.** Ross Valley Sanitary District, the 111-year-old sewer agency serving the Ross Valley, reports that PG&E will use Closed-Circuit TV (CCTV) to confirm that its replacement of gas lines throughout the Ross Valley has not impacted public and private sewer pipes.

PG&E replaced old gas lines to approximately 950 homes over the last year. It will use CCTV to confirm that sewer mains as well as the private sewer lateral pipes, which run from homes and businesses to the public sewer system, were not damaged during the gas line replacement project.

Pacific Gas and Electric will be contacting Ross Valley residents where the inspections on private property will occur and has provided a customer service number to answer questions. For information, residents may call (925) 303-0680 .
