

Protecting Public Health and the Environment

# PROJECT INFORMATION SHEET

## Kentfield Pump Station 15 Improvements Project

As part of maintaining the 200 miles of collection sewer lines operated by Ross Valley Sanitary District (RVSD), a Capital Improvement Program (CIP) is underway with construction projects needed to protect public health and the environment by reducing the risk of sewer overflows.

Work to replace outdated system infrastructure and enhance system reliability is taking place in your neighborhood.

The **Kentfield Pump Station 15 Improvements** will replace old or outdated system infrastructure and enhance local wastewater system reliability and efficiency. The project is being completed at a cost of \$2 million.

Located in Kentfield, the pump station is along Marin County Bicycle Route 20, adjacent to Corte Madera Creek and just south of Stadium Way.

Once the contractor is ready to deliver and install the new pump station equipment, several pickup trucks will arrive and depart each day using Marin County Bicycle Route 20. Trucks will enter from Bon Air Road and travel along Corte Madera Creek to the Pump Station.

*The Capital Improvement Program (CIP) consists of construction projects to replace outdated system infrastructure and enhance local wastewater system reliability and efficiency.*

### PROGRAM GOALS

- Protect public health and the environment by reducing sewer overflows
- Continue working with the community to replace the 75% of outdated sewer laterals that still remain

### PROJECT CONSTRUCTION WILL INCLUDE

- Use of Marin County Bicycle Route 20 for equipment/trucks to access the Pump Station.
- Rehabilitation of portions of the existing pump station, including inlet channel modifications, concrete repairs, manhole modification and rehabilitation and the installation of new electrical equipment.
- Bypass pumping connections and ancillary work.
